The Honorable Robert Gates
Deputy Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Bob:

Please let me call your attention to the attached description of a biometric identification system called IDENTIX. I ran across this a few months ago and was quite fascinated in its unique technology, with obvious application to the problems of positive identification of individuals for access to classified or compartmented areas. I have become an advisor to the president of the company to help them to circulate the idea and naturally think it might be of interest to the Agency. Perhaps you could pass this along to the Director of Security for them to make their usual careful examination of the possible utility of the system to the Agency. If they would like an actual demonstration of the machinery or any further data about it, I am sure the company will be only too pleased to offer it.

Thanks for receiving this and passing it on. I hope it will be of use.

Sincerely,

W.E. Colby
